1 Notes	
1.1. Manual structure	Thismanualisorganizedbyorganization,sothechaptersareinterconnected.Sectio n2:Basic SafetyInformation. Chapter 3: Getting Started Guide Chapter 4: Technical data 
1.2. Typography	The following typographic conventions are used in this manual.
Enumerate	The enumeration is displayed as a list with bullets. • Entry 1 • Entry 2
Action	Action descriptions are represented by a front triangle. The result of the action is represented by anarrow. Action description 1 Action result Action description 2 <b>Step programs can also be displayed numerically in parentheses.</b> (1) Step 1 (2) Step 2
Grammar	Number: Decimal numbers are displayed without additional indicators (eg 123) Hexadecimal numbers are displayed with an additional indicator hex (eg: 00hex or with the prefix "0X" (eg: 0x00)
Cross-reference	Cross-references indicate where to find additional information on this topic.
1.3. Symbols	Notes This symbol indicates a general comment.
	Notice! This symbol indicates the most important safety notice.
1.4. Acronym	FNI FAS Network Interface I Standard input port PN Profinet ECT EtherCAT CIE CC_link IEF Basic EIP Ethernet/IP EMC Electromagnetic Compatibility FE functional ground O Standard output port

**1.5. Viewing deviations** The product views and explanations in this manual may deviate from the actual product. They are only left and right solutions

.....

#### Explain the materials used.

2 safety		
2.1. Expected usage	This manual describes as decentralized input and output modules for connection to an industrial network	
	Precautions!	
<b>2.2.</b> Install and start	Installation and start-up may only be carried out by trained and specialized personnel. A qualified individual is one who is familiar with the installation and operation of the product and has the necessary qualifications to do so. Any damage caused by unauthorized operation or illegal and improper use is not covered by the manufacturer's warranty. Equipment operators are responsible for ensuring that appropriate safety and accident prevention regulations are followed.	
<b>2.3.</b> General	Debug and check	
security	manual carefully.	
Notes	The system cannot be used in applications where the safety of personnel depends on the functionality of the equipment. intended use	
	The manufacturer's warranty coverage and limited liability statement do not cover damage caused by:	
	• Unauthorized tampering	
	• Improper use	
	• Owner/operator's obligations	
	This device is an EMC Class A product. This device generates RF noise.	
	The owner/operator must take proper precautions when using this equipment. Use only a power source compatible with this device and connect only approved cables.	
	Fault	
	In the event of a defect or equipment malfunction that cannot be corrected, the equipment must be taken out of operation to avoid possible damage from unauthorized use.	
	Intended use can only be ensured when the enclosure is fully installed.	
2.4. Corrosion resistance	Precautions! FNI modules generally have good chemical and oil resistance characteristics. When used in aggressive media (e.g. high concentrations of chemicals, oils, lubricants and coolants (i.e. low water content)), these media must be checked before the corresponding application material compatibility confirm. If the module fails or is damaged due to this corrosive medium, no claim for defects can be claimed.	
angerous voltage	Precautions!	
	Disconnect all power sources before using the equipment!

#### 3.2. MMechanical connectionanical

The modules are connected using 2 M6 bolts and 2 washers. Isolation pads are available as accessories.

#### **3.3.** Electrical connections

#### 3.3.1 power port (L-code)

PinPIN	FuncFunction	describe
1	Us+	+24V(BBRR)
2	Ua-*	OV(₩whH)
3	Us-	OV(BBUU)
4	Ua+*	+24V(BBKK)
FE	Functional ground*	FE(YEYE-GGN)

Noted:

1. If possible, provide sensor/module power supply and actuator power supply separately. Total current <9A, even if the actuator power supply is daisy chained, the total current of all modules is <9A.

2. The FE connection from the housing to the machine must be low impedance and kept as short as possible.

#### 3.3.2 Network (B-code)

PiPINn	FuncFunction	
1	VP(+5V)	
2	RxD/TxD-N A line	
3	DGND	
4	RxD/TxD-P B line	

#### NNoted:

Unused  $\mathrm{I}/\mathrm{O}$  port sockets must be covered with end caps to meet IP67 protection rating.

3.3.3 I/O-port (A-code)

pinpin	Funcfunction
1	+24V(BbrR)
2	input/output(wh)
3	<b>0∨(</b> BbuK)
4	input/output(bk)
5	FE(GgyY)

Noted:

1. Regarding digital sensor input, please follow the input guidance of EN61131-2, Type

2. The maximum single output current of pins 2 and 4 is

2A. The total module current is <9A.

3. Unused  $\rm I/O$  port sockets must be covered with end caps to meet IP67 protection level.

**4.1**. size

### 4.2 Mechanical data

Shell material	Die-cast aluminum case, pearl nickel plated
Housing class according to IEC 60529	IP67 (only in plug-in or plug-in style)
Power interface	L-Code (Male and Female)
Input port/output port	M12, A-Code (8*female)
Size(W*H*D)	65mm*222mm*25.8mm
Installation type	2-Through Hole Mounting
Ground Bus Accessories	M4
weight	About 670g

#### 4.3. Operating conditions

Operating temperature	-5°C ~ 70°C
Storage temperature	-25°C ~ 70°C

### 4.4. Electrical data

Voltage	18~30V DC, Symbol EN61131-2
Voltage fluctuation	<1%
Input current at supply voltage 24V	<130mA

port	profibus-DP
cport conection	M12, B-Code
Cable types according to profibus-DP	S <b>bh</b> ielded twisted pair
data transfor rata	9.6 kBit/s,19.2 kBit/s,93.75 kBit/s,187.5 kBit/s
uata transfer fate	500kBit/s,1.5MBit/s,3MBit/s,6MBit/s,12 MBit/s
MaManimunacable length	100m
fl flow control	HalfHalf working condition

## $4.6\ {\rm funcfunction}\ {\rm indicator}$

	GN light Always on	Communication is normal	
	GN light flashes 2HZ	The master station is in CLEAR state	
BUS	ed light flashes 1H	Z Not configured	
	<b>Fedasiking</b> flashes 2HZ	no data exchange	
	${f R}$ ed light Always o	n Configuration error	
US	GN <b>h</b> ight	Inpnput voltage is normal	
	RF1 asht ng ashes	In Input voltage low (< 18 V)	
UA	GN light	O Output voltage is normal	
	Relation glashes	Output voltage low (< 18 V)	
	Red light Always or	T No output voltage present (< 11 V)	

### I/O pport status

LED	state	Fu Function
1	close	Th∉he status of Pin4 input or output is 0
1	YEYE	The status of Pin4 input or output is 1
1	REREDD	The port is configured as input: Pin1 overcurrent. The port is configured as output: Pin4 overcurrent.
1	Flashing red	ing Thhe port is configured as output: Pinl overcurrent
2	ClClose	The <b>\$</b> he status of Pin2 input or output is 0
2	YYE	The status of Pin2 input or output is 1
2	RED	Th The port is configured as input: Pin1 overcurrent. The port is configured as output: Pin2 overcurrent.
2	RED 15 bahihign 2 h	The port is configured as output: Pinl overcurrent

**5** integrated

5.1 Module configuration

**5.1.1** rreset

2. 1. When the device is powered off, dial 900;

2. Power on the device and wait 10 seconds;

3. 3. Power off the device and dial the code to the state before setting;

4. Power on the device and restore it to factory status;

 $5.1.2\ {\rm Node}\ {\rm address}\ {\rm configuration}$ 

- ① The node address is assigned by PLC: Dial address X100=4 X10=0 X1=0
- ② Manual allocation of node address: Dial address
  - X100=4, node number is X10=tens digit X1=units digit

3. Double-click the module to enter the configuration,

(1) Slot function configuration: in the hardware catalog -- module select the required data and drag it into the slot in the device overview window;

(2) Module port function configuration: Click the module icon, select "General", and then click slot 1 to configure the port function

(3) After the configuration is completed, click Download in the configuration view.

Page 12 of 13

www.fas-elec.com

(4) After the configuration is complete, in the configuration view, click Download.

4. Assign module PN name: PLC switch to online state, select "ungrouped device"---click on the module name---select online and diagnosis---function---assign **PROFIBUS** device name-----Select the module to be assigned in the list (should be selected according to the physical MAC) --- Click "Assign Name" to complete the configuration!
